

HPH Series J-Hook Installation Instructions

Mounting to a vertical surface: HPH16, HPH32, HPH48 and HPH64

Use a nail*, bolt* or screw* with a minimum head diameter of 0.329" (Fig.1-A) and an appropriate length for the substrate (Fig.1-B) to fasten the HPH J-Hook (Fig.2) to the vertical surface (Fig.3). Insert the cables and close the latch as shown in Fig.3. The latch must be in the closed position as shown in Fig.4 to secure the cables and complete the installation.

Fig.1

Fig.2

Fig.3

Fig.4

Part No.	Hook Size	Fig. No.	UL Load Rating LBS. N		Description
HPH16	1"	2 & 4	20	88.96	1" Standard HPH J-Hook, size 16
HPH32	2"		17	75.62	2" Standard HPH J-Hook, size 32
HPH48	3"		20	88.96	3" Standard HPH J-Hook, size 48
HPH64	4"		17	75.62	4" Standard HPH J-Hook, size 64

Mounting to a rod or ceiling wire with a Multi-Function Clip-Batwing: HPH16W, HPH32W, HPH48W and HPH64W

HPHXXW J-Hooks (Fig.1) are pre-assembled to Multi-Function Clip-Batwings at the factory using a fastener such as a rivet or a zinc plated ¼-20 x 3/8" pan head Phillips machine bolt and a grade A ¼-20 hex Nylon locknut (Fig.2). A plain HPH J-Hook may be assembled to a UL listed batwing clip in the field with the use of a similar fastener. Depress the batwing between your fingers (Fig. 3). Attach the HPHXXW to 12 gauge ceiling wire or 1/4" threaded rod (Fig.4 and Fig.6). Insert the cables and close the latch (Fig.5 and Fig.7). The latch must be in the closed position as shown in Fig.8 to secure the cables and complete the installation.

Fig. 2

Fig. 3

Fig. 4

Fig. 5

Fig. 6

Fig. 7

Fig. 8

Part No.	Hook Size	Fig. No.	UL Load Rating		Description
			LBS.	N	
HPH16W	1"	1 & 8	20	88.96	1" Batwing HPH J-Hook, size 16
HPH32W	2"		20	88.96	2" Batwing HPH J-Hook, size 32
HPH48W	3"		20	88.96	3" Batwing HPH J-Hook, size 48
HPH64W	4"		20	88.96	4" Batwing HPH J-Hook, size 64

Mounting to a rod or a horizontal surface with an Angle Clip 90°: HPH16AC, HPH16AC6, HPH32AC, HPH32AC6, HPH48AC, HPH48AC6, HPH64AC & HPH64AC6

HPHXXAC and HPHXXAC6 J-Hooks (Fig.1 and Fig.2) are pre-assembled to Angle Clips 90° at the factory using a fastener such as a rivet or a zinc plated 1/4-20 x 3/8" pan head Phillips machine bolt and a grade A 1/4-20 hex Nylon locknut (Fig.3). A plain HPH J-Hook may be assembled to a Platinum Tools Angle Clip 90° in the field using a similar fastener. Fasten the HPHXXAC or HPHXXAC6 to 1/4" or 3/8" threaded rod using two standard hex nuts (Fig.4). Thread a single nut up to the desired location of the threaded rod. Guide the HPHXXAC or HPHXXAC6 onto the threaded rod. Thread a second nut onto the threaded rod and tighten to the first nut, thereby sandwiching the Angle Clip 90° between the two nuts (Fig.5). An HPHXXAC or an HPHXXAC6 may be fastened directly to the underside of a horizontal surface using an appropriate fastener* (Fig.6). Use a fastener with an appropriate head diameter (Fig.7-A) and an appropriate length for the substrate (Fig.7-B). Place the cables in the hook and close the latch as shown in Fig.5 and Fig.6. The latch must be in the closed position as shown in Fig.8 and Fig.9 to secure the cables and complete the installation.

Fig.3

Fig.4

Part No.	Hook Size	Fig. No.	Load Rating LBS. N		Description
HPH16ACPA	1"	1 & 2	20	88.96	1" 90° Angle w/PAN HPH J-Hook, size 16
HPH32ACPA	2"		20	88.96	2" 90° Angle w/PAN HPH J-Hook, size 32
HPH48ACPA	3"		20	88.96	3" 90° Angle w/PAN HPH J-Hook, size 48
HPH64ACPA	4"		20	88.96	4" 90° Angle w/PAN HPH J-Hook, size 64

Mounting to a beam with an HOK24 or HOK58 Hammer-On Beam Clamp: HPH16HOK24, HPH16HOK58, HPH32HOK24, HPH32HOK58, HPH48HOK24, HPH48HOK58, HPH64HOK24 and HPH64HOK58

Secure a Hammer-On Beam Clamp to a flange using a hammer as shown in Fig. 5 & Fig. 6 below.

Note: The HOK-24 is designed for flanges from 1/8" to 1/4" thick; the HOK-58 is designed for flanges from 5/16" to 1/2" thick.

Fig.6

Mounting to a beam with an FM24 or FM58 Hammer-On Beam Clamp: HPH16ACFM24, HPH16ACFM58, HPH32ACFM24, HPH32ACFM58, HPH48ACFM24, HPH48ACFM58, HPH64ACFM24 and HPH64ACFM58

Secure a knock-on beam clamp to a flange using a hammer as shown in Fig. 5 & Fig. 6 below.

Note: The ACFM24 is designed for flanges from 1/8" to 1/4" thick. The ACFM58 is designed for flanges from 5/16" to 1/2" thick. Both the ACFM24 & ACFM58 can be rotated 360°.

Mounting to a beam with a BC Beam Clamp: HPH16BC, HPH16ACBC, HPH32BC, HPH32ACBC, HPH48BC, HPH48ACBC, HPH64BC and HPH64ACBC

Secure a screw-on beam clamp to a flange using a 3/8" socket driver or wrench as shown in Fig.5, 6, 7, & 8 below. Tighten the bolt to 20 in-lb.

Note: The BC & ACBC's are designed for flanges up to 1/2" thick. The ACBC can be rotated 360°.
