

# 2 x 2MP Mobile Dual-sensor Dome Camera

## H.265 IR Network Camera

#### System Overview

The Dahua DH-IPC-HDBW4231FN-E2-M12 Dual-sensor Mobile Dome Camera features two (2) 1/2.8-in. 2 MP Progressive Scan STARVIS<sup>™</sup> CMOS Sensors each with a choice of a 2.8 mm or a 3.6 mm fixed lens. Each sensor can be positioned and configured independently of the other allowing flexible, multi-directional video surveillance that is ideal for monitoring the front and rear of a bus or a train. The camera offers True Wide Dynamic Range, a True Day/Night IR Cut filter, IP67 Ingress protection and operation in extreme temperatures to deliver superior images in all lighting and environmental conditions.

### Functions

#### Design for Mobile Surveillance

The compact housing blends in with most vehicle interiors and minimizes interference with other installed devices. The design also minimizes vibration and shock from normal driving situations. The hardware of the mobile camera is certified to EN50155 to avoid image distortions or connection failures. The camera uses an M12 D-coded Ethernet connector for an added level of stability.

#### Starlight Technology

For challenging low-light applications, Dahua's Basic Starlight Technology offers best-in-class light sensitivity, capturing details in low light down to 0.009 lux. The camera uses a set of optical features to balance light throughout the scene, resulting in clear images in dark environments.

#### True Wide Dynamic Range

The camera achieves vivid images, even in the most intense contrast lighting conditions, using industry-leading wide dynamic range (WDR) technology (channel 1 only). For applications with both bright and low lighting conditions that change quickly, True WDR (120 dB) optimizes both the bright and dark areas of a scene at the same time to provide usable video.

- Two (2) Independent 1/2.8-in. 2 MP STARVIS<sup>™</sup> CMOS Sensors
- Dual-stream Encoding per Channel
- H.265 and H.264 Dual Codecs
- 2 MP at 30 fps Maximum Resolution per Sensor
- 2.8 mm or 3.6 mm Fixed Lens per Sensor
- M12 D-coded Ethernet Connector
- Basic Starlight Technology for Low Light Sensitivity
- True Wide Dynamic Range (Channel 1) and True Day/Night (ICR)
- Built-in Microphone
- Maximum IR LED Distance 20 m (66 ft) with Smart IR
- EN 50155 Shock and Vibration Certification
- IP67 Ingress Protection and IK10 Vandal Resistance
- Five-year Warranty\*

### High Efficiency Video Coding (H.265)

The H.265 (ITU-T VCEG) video compression standard offers double the data compression ratio at the same level of video quality, or substantially improved video quality at the same bit rate, as compared to older video compression technologies. H.265 offers such impressive compression by expanding the pattern comparison and difference-coding, improving motion vector prediction and motion region merging, and incorporating an additional filtering step called sample-adaptive offset filtering.

#### Environmental

With a temperature range of -30 °C to +60 °C (-22 °F to +140 °F), the camera is designed for extreme temperature environments. The camera complies with an IK10 impact rating making it capable of withstanding the equivalent of 5 kg (11.02 lbs) of force dropped from a height of 40 cm (15.75 in.). Subjected and certified to rigorous dust and water immersion tests, the IP67 rating makes it suitable for demanding outdoor applications.

#### Protection

Supporting  $\pm 30\%$  input voltage tolerance, this camera suits even the most unstable conditions for outdoor applications. Its 4KV lightning rating provides protection against the camera and its structure from the effects of lightning.

 The DORI distance is a measure of the general proximity for a specific classification to help pinpoint the right camera for your needs. The DORI distance is calculated based on sensor specifications and lab test results according to EN 62676-4, the standard that defines the criteria for the Detect, Observe, Recognize and Identify classifications.
